BULK CONTAINERS

220L, 1,041L, 22,000L

DRUM 58 Gallons - 220 Liters

Heavy-duty *food grade* plastic drum constructed of weather resistant polyethylene able to contain liquids up to 180°F. These industrial drums are designed for reconditioning and reuse without inner liners or polyethylene bags. Storage drums may stack up to 4 high. FDA and USDA approved. Closed Head Drums have standard bung configuration of a 2" NPT and one 2" buttress. The extra large molded lifting ring improves drum handling.

TOTE 275 Gallons - 1,041 Liters

A 275 gallon *food grade*, air and water tight container with an 8" bung on top & a 2" threaded valve on the bottom. Length is 48", width is 39" and height is 46". Space-saving durable, storage containers are easily transportable and reusable. They are easy to fill, stack and load. FDA compliant steel cage is hot-dipped galvanized. Pallet base is made from both steel and plastic. Includes inner storage tank made from white plastic with UV-blocking additive. Complete unit is UN approved (UN 31HA1/Y).

FLEXITANK 5,812 Gallons - 22,000 Liters

Composed of four-layer PE inner film (0.125mm) and a coated PP woven high strength and wear-resistant 220g/m² fabric. The feeding valve is available in either a 2" ball, 3" butterfly or 4" butterfly type valve on the flexitank top. The discharge valve is either a 3" or 4" butterfly type at the base of the unit. ISO Container may be transported over the road, by rail or ocean vessel.

Made in the U.S.A. to ISO 9001:2000 standards
